

1. Introduction of Project

This E-newspaper website is made for people who want to read the latest news online. It has different sections like Top News, Health Care, India, World, and City, so readers can quickly find the type of news they are interested in.

Every news article can include pictures and videos to make the stories more clear and engaging. The website also has a search option, which helps users find news on any topic they are looking for without wasting time.

Another helpful feature is that the website supports multiple languages. This means readers can choose their preferred language and read the news comfortably.

The website is designed in a simple and user-friendly way, so anyone can use it easily, even if they are not very familiar with technology. With this site, people can stay updated with the latest news from their city, country, and the whole world in just a few clicks.

2. Current / Existing System

Aaj Tak:

Aaj Tak is one of the most popular Hindi news platforms in India. It provides news as it happens, with real-time updates so readers and viewers always stay informed. Along with written news, it also offers live TV streaming and multimedia content like videos and images, which make the news more engaging.

The platform covers a wide range of topics such as politics, sports, entertainment, business, and world news, so people can get all kinds of information in one place.

Aaj Tak is run by the India Today Group, which is well known for its trustworthy journalism and wide coverage across different subjects. Because of its speed, accuracy, and clear presentation, Aaj Tak has become a reliable source of news for millions of people across India.

a) Flow/Process

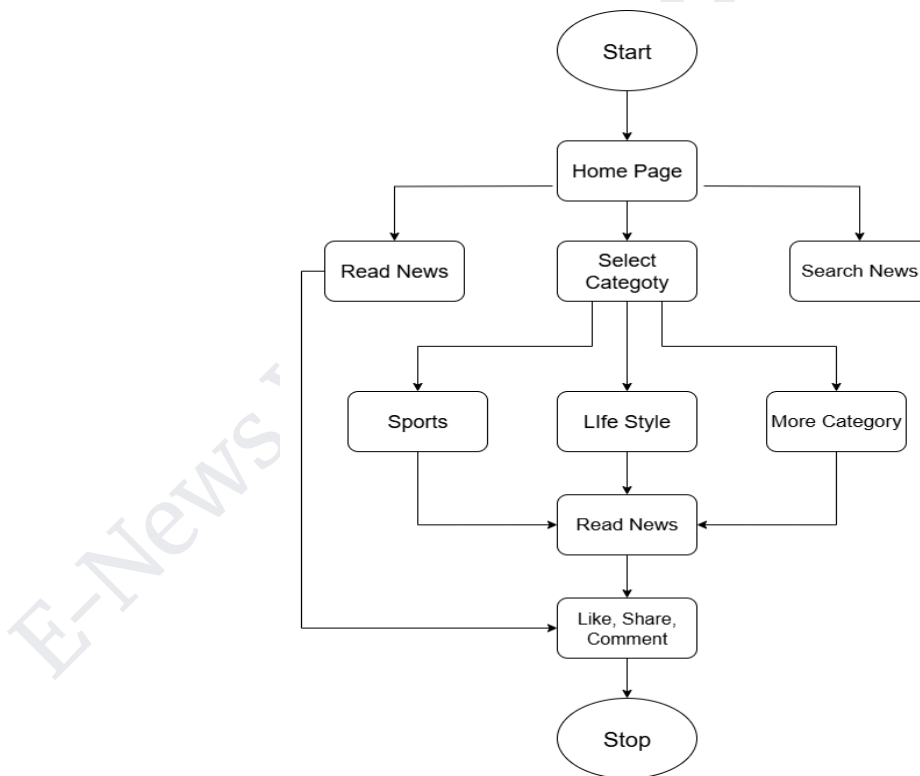

fig. 1: Existing System Flow

b) Drawbacks

(i) Messy UI

The Aaj Tak website is not very user-friendly. It often looks cluttered with too many ads and pop-ups, which can distract people while reading the news. The navigation is confusing, making it difficult for users to quickly find the information they want.

(ii) Sensationalism

Sometimes, Aaj Tak presents news in a very dramatic or emotional way. Even small incidents are shown with bold headlines like “Breaking News”, which can make them seem bigger or more serious than they really are. This style is mainly used to catch the audience’s attention.

(iii) TRP-Driven Content

Much of the focus is on increasing TRP (Television Rating Points) rather than sharing important or balanced news. Shows are often made to look more like entertainment rather than serious journalism. This means the priority is what gets more viewers, not always what is most truthful or meaningful.

(iv) Repetitive Coverage

Aaj Tak often shows the same big story again and again without adding much new information. The same video clips, headlines, and updates are repeated, which can make the news feel boring or less useful for regular viewers.

(v) Less Regional or Ground-Level Reporting

The channel mainly focuses on national-level news and urban issues, while local or rural problems don’t get much attention. Because of this, many important ground-level issues that directly affect people in villages and small towns are not highlighted properly.

(vi) In-Article Translation

The website does not provide smooth in-article translation options. This makes it difficult for people who are not comfortable with Hindi to understand the news clearly. A lack of translation support limits the reach of their content to non-Hindi speakers.

(vii) Text-to-Speech (TTS)

Very few news websites provide a proper text-to-speech feature. Even when it is available, the voice often sounds robotic and does not flow naturally, making it uncomfortable for users to listen to the news.

(viii) Dark Mode

Many news websites still do not have a dark mode option. This can cause eye strain for people who like to read news at night or in low-light conditions. Dark mode would make reading much more comfortable in such cases.

(ix) No Ads

Most news sites are filled with intrusive ads and pop-ups. These ads often disturb the reading experience and can be very annoying for users. An ad-free experience is rare, even though it would make news reading smoother and more enjoyable.

E-News Web Platform / Tirth R. Modi

3. Proposed System

Prime Report is an online news platform that makes it easy for people to stay updated with the latest stories. It organizes news into simple categories like Top News, Health Care, India, World, and City, so users can quickly find the type of news they want to read. A search option is also available to help readers instantly locate news on any topic.

Each article can include photos and videos, making the content more engaging and easier to understand. The website also supports multiple languages, allowing readers to enjoy the news in their preferred language. The overall design is clean and user-friendly, so anyone can use it without difficulty.

Unlike many other e-newspapers, Prime Report offers unique features that make the reading experience better. These include:

- In-article translation – instantly switch the news into another language.
- Text-to-speech (TTS) – listen to the news instead of reading.
- Dark mode – reduce eye strain when reading at night or in low light.
- No ads – enjoy a smooth, distraction-free experience.

With these features, Prime Report is designed to be modern, simple, and comfortable for all types of readers.

a) Modules:

(i) User : Users visit the website to read news articles from various categories. They can save their favorite articles, like and comment on news, and easily share content on social media. The system is designed to provide a smooth and interactive experience for all readers.

(ii) Journalist : Journalists create and write news articles and submit them to the admin for review. They can include photos and videos to support their stories. Their role is to provide accurate and timely news content for publication.

(iii) Admin: The admin manages the entire website and system, ensuring everything runs smoothly. They review and approve news articles submitted by journalists and publish them on the website. The admin also handles website maintenance and user management tasks.

b) Features:

- **Clean & Neat UI**
The website has a simple, user-friendly, and attractive design. It is easy to navigate, clutter-free, and makes reading news a smooth experience.
- **Fact-Based Reporting**
Prime Report is committed to providing accurate and verified information. Every article is based on facts to ensure readers get trustworthy and reliable news.
- **Diverse Coverage**
The platform covers a wide range of topics, so readers can explore stories in areas like politics, sports, health, entertainment, technology, and more.
- **Strong Regional Reporting**
In addition to national and global news, Prime Report also provides in-depth coverage of local and regional issues, helping communities stay updated on matters that directly affect them.
- **No Ads**
Unlike many other platforms, Prime Report offers a completely ad-free experience, making reading smooth, clean, and distraction-free.
- **Dark Mode**
The website includes a dark theme option that reduces eye strain, especially useful when reading at night or in low-light environments.
- **Text-to-Speech (TTS)**
Readers can use the text-to-speech feature to listen to articles instead of reading them. This makes it easy to stay informed while traveling, working, or multitasking.
- **In-Article Translation**
With just one click, users can translate any article into their preferred language, making the platform accessible to readers from different backgrounds.
- **Category-Wise News**
News articles are organized into clear categories such as Top News, Health, India, World, City, Sports, and Entertainment, so users can quickly find what they want.
- **Photo & Video News**
Articles include high-quality images and videos to make stories more engaging and easier to understand.
- **Social Media Sharing**
Prime Report allows readers to instantly share news on popular social platforms, helping spread information quickly and easily.

c) Scope:

The scope of Prime Report is to provide a convenient and reliable online platform where users can easily access news from different categories such as Top News, Health, World, India, and City.

The system is designed with a clean and user-friendly interface, making it simple for readers to browse category-wise news. Articles are enriched with photos and videos to create a more engaging reading experience, along with trending updates and a search feature to quickly find news on any topic.

Prime Report also offers interactive features for users. Readers can:

- Save articles to read later.
- Like news articles they find interesting.
- Share stories on social media platforms.
- Post comments to express their opinions and engage with others.

On the management side, the platform includes an admin-controlled content publishing system, ensuring smooth and organized updates. To reach a wider audience, Prime Report also supports multiple languages, allowing people from different backgrounds to stay informed in their preferred language.

Overall, the project's scope is to create a modern, interactive, and accessible digital newspaper that delivers news efficiently and comfortably to its readers.

4. Hardware and Software Specification

a) User Side

- Hardware Specifications
 - Devices: Desktop, Laptop, Smartphones, Tablets (Any internet-enabled device)
 - RAM: Minimum 2 GB
- Software Specifications
 - Internet: Minimum 2 Mbps speed recommended
 - Browser: Any modern browser (Chrome, Firefox, Safari, Edge) with JavaScript enabled
 - Operating System: Any OS (Windows, macOS, Android, iOS, Linux) that supports modern browsers

b) Admin Side

- Hardware Specifications
 - Devices: Desktop or Laptop
 - Minimum CPU: Intel i3 or equivalent (i5 or better recommended)
 - RAM: Minimum 4 GB (8 GB recommended)
- Software Specifications
 - Internet: Minimum 5 Mbps speed for smooth uploads and management
 - Browser: Any modern browser (Chrome, Firefox, Edge)
 - Operating System: Windows 10/11, macOS, Linux (any stable OS)

5. Analysis

a) Fact Finding Methods

Comparison Table:

Sr. No.	Feature	Prime Report	Aaj Tak	TV9	Sandesh	Times of India
1	Clean & Neat UI	✓ Yes	✗ No	✗ No	✗ No	✗ No
2	Fact-based reporting	✓ Yes	✗ No	✓ Yes	✓ Yes	✓ Yes
3	Diverse Coverage	✓ Yes	✗ No	✗ No	✗ No	✗ No
4	Strong Regional Reporting	✓ Yes	✗ No	✓ Yes	✓ Yes	✓ Yes
5	No Ads	✓ Yes	✗ No	✗ No	✗ No	✗ No
6	Dark Mode	✓ Yes	✗ No	✗ No	✗ No	✗ No
7	Text-to-Speech (TTS)	✓ Yes	✗ No	✗ No	✗ No	✗ No
8	In-Article Translation	✓ Yes	✗ No	✗ No	✗ No	✗ No
9	Category-wise News	✓ Yes	✓ Yes	✓ Yes	✓ Yes	✓ Yes
10	Photo & Video News	✓ Yes	✓ Yes	✓ Yes	✓ Yes	✓ Yes
11	Social Media Sharing	✓ Yes	✓ Yes	✓ Yes	✓ Yes	✓ Yes

b) Feasibility Study

i) Operational Feasibility

The system is designed to be easy to use for both readers and administrators. To help users operate the website correctly, we provide user guidelines. The interface is simple and user-friendly, with clear navigation, category-wise browsing, and an easy search feature.

Readers can read articles comfortably, as well as save, like, share, and comment on news to stay engaged. For administrators, the system ensures smooth content management, making daily publishing and updates manageable.

Therefore, our system is Operationally Feasible.

ii) Technical Feasibility

Prime Report is developed using reliable and widely used technologies. The front-end is built with HTML, CSS, and JavaScript, while the back-end uses MySQL for database management. These technologies are open-source, well-documented, and easily available, which makes development, testing, and maintenance smooth and cost-effective.

Hence, our system is Technically Feasible.

iii) Economic Feasibility

The project is cost-effective because it uses open-source technologies, meaning there are no expenses for premium software licenses. Additionally, we already have the required hardware resources such as laptops and internet connectivity, so no extra investment is needed.

Thus, our system is Economically Feasible.

- Prime Report is fully feasible from all aspects.

It is operationally user-friendly, technically reliable, and economically cost-effective.

No extra hardware or software costs are required, making the system easy to develop, implement, and maintain.

Delhi Woman Attacks Sleeping Husband With Boiling Oil, Chilli Powder: Cops

Short Description *

On October 3, a 28-year-old pharmaceutical firm worker was brought to Safdarjung Hospital with severe burns and was admitted to the ICU in a critical condition.

Full Content *

New Delhi: As Dinesh lay asleep in his Madangir house, his wife poured boiling oil and red chilli powder on him, sending him into screams that rent the dead calm of the night. On October 3, a 28-year-old pharmaceutical firm worker was brought to Safdarjung Hospital with severe burns and was admitted to the ICU in a critical condition. According to an FIR lodged at Ambedkar Nagar Police Station the same day, Dinesh's wife poured hot oil on his torso around 3 am while he lay asleep, with the

Delhi Woman Attacks Sleeping Husband With Boiling Oil, Chilli Powder: Cops

Short Description *

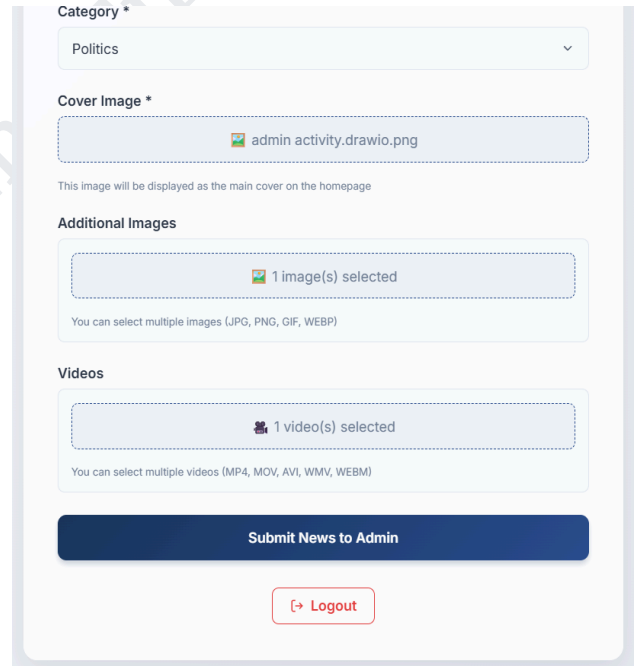

On October 3, a 28-year-old pharmaceutical firm worker was brought to Safdarjung Hospital with severe burns and was admitted to the ICU in a critical condition.

Full Content *

New Delhi: As Dinesh lay asleep in his Madangir house, his wife poured boiling oil and red chilli powder on him, sending him into screams that rent the dead calm of the night. On October 3, a 28-year-old pharmaceutical firm worker was brought to Safdarjung Hospital with severe burns and was admitted to the ICU in a critical condition. According to an FIR lodged at Ambedkar Nagar Police Station the same day, Dinesh's wife poured hot oil on his torso around 3 am while he lay asleep with the

9. Future Enhancement

- Mobile App Development
 - Create a dedicated Android and iOS app for a better mobile experience.
 - Add offline reading so users can save articles and read them without the internet.
- Personalized News Feed
 - Use AI/ML to recommend news articles based on a user's reading history and interests.
 - Provide notification alerts for breaking news in the user's favorite categories.
- Advanced Search & Filters
 - Add filters by date, region, or author.
 - Introduce voice-based search for easier accessibility.
- Interactive Features
 - Add polls, quizzes, and surveys to increase reader engagement.
 - Enable live Q&A or discussion forums during trending events.
- Multimedia Expansion
 - Introduce podcasts and live news streaming.
- Stronger Security & Privacy
 - Implement two-factor authentication for user accounts.
- Monetization Options
 - Offer premium subscriptions with exclusive content.
 - Allow donations or memberships instead of ads.
